

The following evaluation is a Sonograph Vocal Profile developed from the research tenets of Human BioAcoustics. The software used for this evaluation is available to the public from www.nanoVoice.org at no charge. **Profiles are presented here in the hope of sparking discussion and insights.** All issues are expressed in term of Frequency Equivalents™ © 2017

The World at Risk: Megalomania in High Places

<https://www.youtube.com/watch?v=O7CXMC9-Rh4>

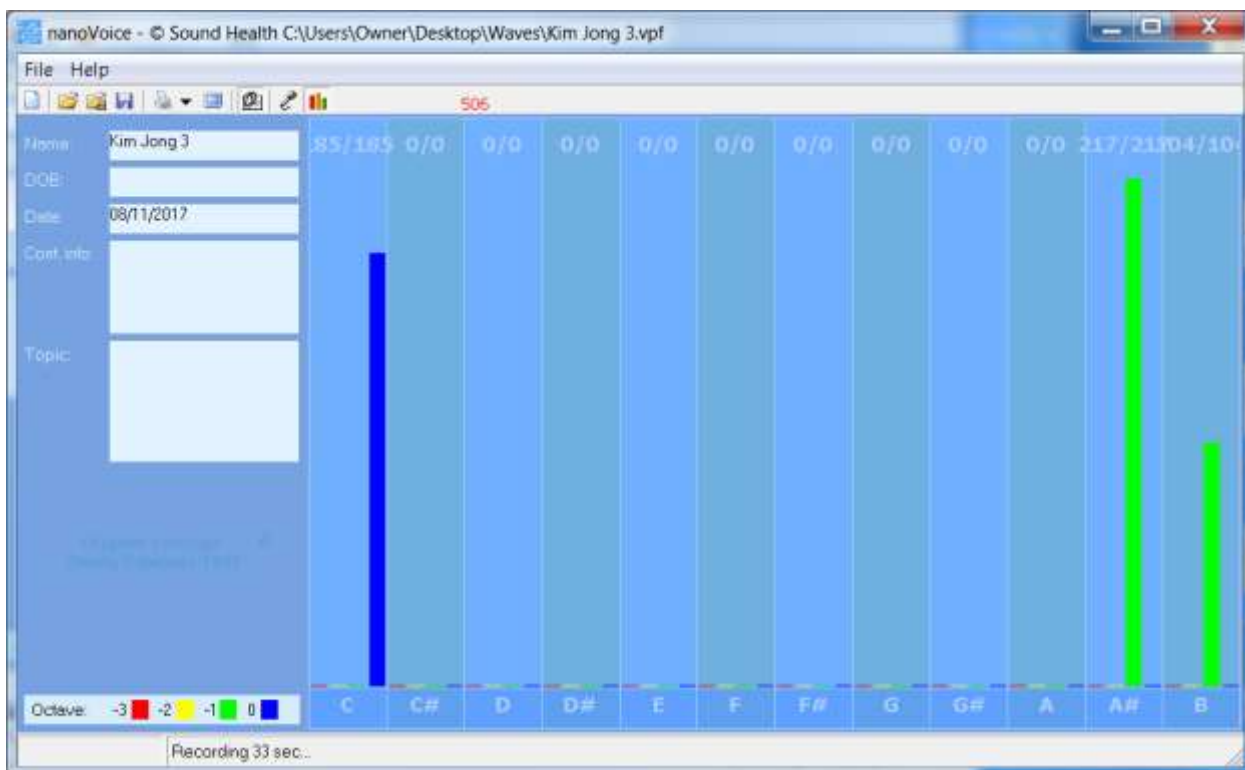

Kim Jong-un,
Supreme Leader
of North Korea,
gives passionate
speech (English
subtitles)
FUNNY

A Vocal Profiling Analysis of Dictator Kim's Voice Indicates:

- His intellectual rhetoric is so others can accept his intended physical outcome
- Only three notes [I've only seen this in religious zealots and mentally disturbed persons. SE]
- Somehow thinks he is protected and only others will be hurt
- He wants and craves appreciation and adulation – a lack of these will meet with wrath and rage
- The only ego showing is located in the octave known to indicate naïveté
- He thinks he is willing to die a martyr, but actually he is very egotistically based
- He is convinced this is his moral duty and thinks he has protection
- He lacks balance between perception of the situation and reality outcomes – thinks outcomes he wants will be preserved and protected

- He lacks balance dealing with perception, action, words, information and useful outcomes
- He thinks his actions are a spiritual duty
- Most of his emotion is in naïve ego
- He thinks he is the chosen one
- Intellect most high as indicated by the notes of G and B; useful physical
- Outcomes “for the people” -- a religious-like call from other time/space
- He describes himself as charismatic but actually is severely narcissistic
- He is gruesomely missing in emotions that would establish balance with those around him
- No amount of cruelty will bother him or prevent him from his goal
- Gadhafi’s zealotry was to support his people; with Kim Jong Un the zealotry is in support of some sort of personal spiritual aggrandizement.

BioAcoustic Vocal Profiling Conclusions

OPINION: Dictator Kim is very unstable. His bluster is not a bluff; he thinks he was *chosen* for a great role in history.

His voice has only 3 notes -- in martyr -- like caring, but in naïve-based octaves. He is willing to annihilate anything that gets in his way of becoming the leader of all.

He is just looking for a place to start. BioAcoustically, he belongs in the Horror Roll of insane world tyrants. He was brought up this way, taught to think that this is his destiny. His vocal print is very akin to that of Muammar Gaddafi.

Having only three notes indicates that he is emotionless. No amount of cruelty will phase him or prevent him from attacking his goal. Unless there was a technical problem with the microphone that only allowed those three notes (not likely) we are faced with a very troubled and dangerous megalomaniac.

STATEMENT OF FACT: The information herein contains opinions concerning correlations between personality traits and frequencies found within the voice. The computer printouts are generated by a computer using fast Fourier transforms and voice spectral analysis developed by the Institute of BioAcoustic Biology – a non-profit research organization: SoundHealthOptions.com – 740-698-9119.

Vocal Profiling Note Correlate Chart

Thank you for taking the opportunity to experience the **nVoice™** Personality Profiler computer program. As you speak into the microphone, the computer will catalog your words into musical note and patterns. Your print-out will reflect the twelve notes of the musical scale – C, C#, D, D#, E, F, F#, G, G#, A, A# and B; plus the octave(s) in which you speak. The notes, octaves and general architecture of your vocal graph are used to create a computerized **nVoice** Personality Profile for you. Each of these notes has general characteristics which are explained in the chart above. The database used

Remember that each written report will reflect what you say as well as what you don't say.

for your analysis has been developed over the last twenty-plus years as we collected data. We would appreciate feedback as to how you think your profile matches the REAL you.

For this particular type of vocal profiling, your emotions can greatly influence the

outcome. If you would like information about a variety of subjects, take several voice samples; keeping to one subject for each profile. Every print-out will be "flavored" by the subject you talk about.

You may find conflicting statements on your report. This indicates that these same conflicts reside within your own personality. As you talk about different subjects you will be able to determine the conflicts and joys of each subject.

If you doubt the accuracy of your **nVoice** Personality Profile, ask a friend who will tell you the truth about how you are perceived by others.

If you print-out your report in color, there is a possibility that you have one or more of four different colors on your chart- blue, red, yellow and green. Multiple colors on one chart indicate a multi-faceted approach to that subject.

Blue is indicative of an overall love for humanity, the ability to put others first, an emotional perspective and possible naiveté. A nun or minister type who gives more than they receive.

Yellow is indicative of mental processing, an intellectual outlook, a logical, cautious perspective. A lawyer type who can see all sides and acts depending on the desired outcome.

Green indicates a need to accomplish, someone who can plan ahead, appears reliable and is ready to go after careful thought. A Farmer type; on the negative side a con man.

Red is indicative of a physical call to action but without a lot of thought for the consequences of the action. Red likes to see and do things first before the rest of the crowd. A Fireman type who can assess a situation quickly and act accordingly.

Each note needs to be matched with a color and its interpretation.

A demo version of this software can be downloaded from www.nanoVoice.org along with instructional video and charts

For example someone could have a very high note of C that was red – this person might use his/her ego or strength to get their way without much thought for the outcome. A bully or autocrat.

If the same high C was green that person might use their first-hand experience to manage getting something accomplished. A leader by qualifications alone who may or may not have many people skills. A workaholic who has little respect for the time commitments of others.

If the high C was yellow the person might want their way because of their education or position. They tend to think they knew best for everyone involved. There is usually a disregard for the opinions of others with this politically astute yet authoritarian perspective.

If a high C is blue this is likely to be an emotional leader who champions a cause for the rights of others. This is not always a logical or rational leadership style but more of a charismatic approach. An uncompromising extremist.

Each note can be assessed using the color and note information. Remember that the examples above are for extremes of a note being well above normal.

Nothing is wrong in your voice; it is what you do with the information that is important. This evaluation is by no means inclusive. It serves to provide a perspective about you as it relates to your topic your chose. For more information about your **nVoice** report, please visit your nearest Human BioAcoustic Vocal Profiling professional.
